

Mothership™

grow
your **OWN**

Completely Self Sufficient and easy to use

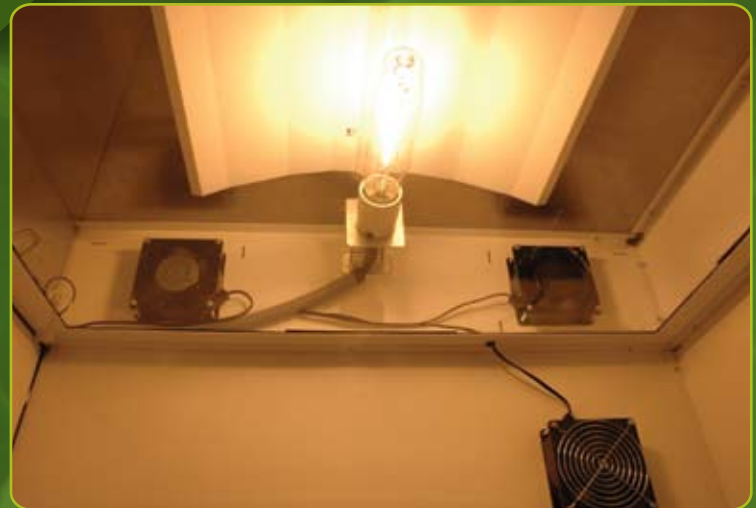

The Mothership™ holds 2 mother plants and a power cloner or 4 plants in full cycle. It's a turn-key operation: just plug it in, add your nutrients and you are ready to Grow Your Own!

- **Revolutionary Computer Control Center:** BCNL's proprietary Grosmart™ technology makes for the most user-friendly model on the market. Pre-programmed to perfectly control all levels of watering, lighting, air circulation & exhaust.
- **Compact Design:** Dimensions are **28.5"W x 46"H x 27.5" D** wheels on.
- **Plugs Into 110v Outlets:** Draws approximately 6 amps, which is less than most household appliances.
- **Unlimited Toll-free Tech Support:** Included to help you achieve peak yields and performance.
- **Easy-to-Follow Manual:** Step-by-step pictures included with every Mothership provide quick access to answers when you need them.
- **Full One Year Warranty!**

Chamber Features

- The Mothership™ uses a 400 watt MH bulb. The system utilizes the same air cooled lighting system as our other units, enabling an optimum growing environment. An independent exhaust system maintains the ideal growing temperature by allowing the heat created from the lighting system to be removed from the unit immediately.
- The Mothership™ will feed 1-4 Producers with maximum efficiency. While your factory of Producers are hard at work flowering, you can start your next batch of clones in the Mothership, the result is much faster crops and total control.
- The Mothership™ is made from high quality precision cut aluminum, providing durability and allowing for easy cleaning and no mold or mildew buildup.
- White powder coated finish utilizes maximum reflectivity, providing an industry leading lumen per watt ratio.
