Bonus T-5 Upgrade:

Royale With Cheese Upgrade

Everybody loves cheese! We have decided to take our world renowned Royale packages one step further by introducing "Cheese"! The cheese tops off your Bloombox or Producer Royale with a state of the art tri meter, herb trimmer and upgrades our silver pack of nutrients with the introduction of the Advanced Nutrients' Connoisseur Bloom A & B line! Doesn't get any better than this.

Accessories Included

Everything you need for a turnkey solution. The accessory pack includes: Digital PH Pen, Digital TDS Pen, Electrode Storage Solution, Measuring Syringe, Pruning Scissors, Cloning Scalpel and Indoor/Outdoor Digital Thermometer.

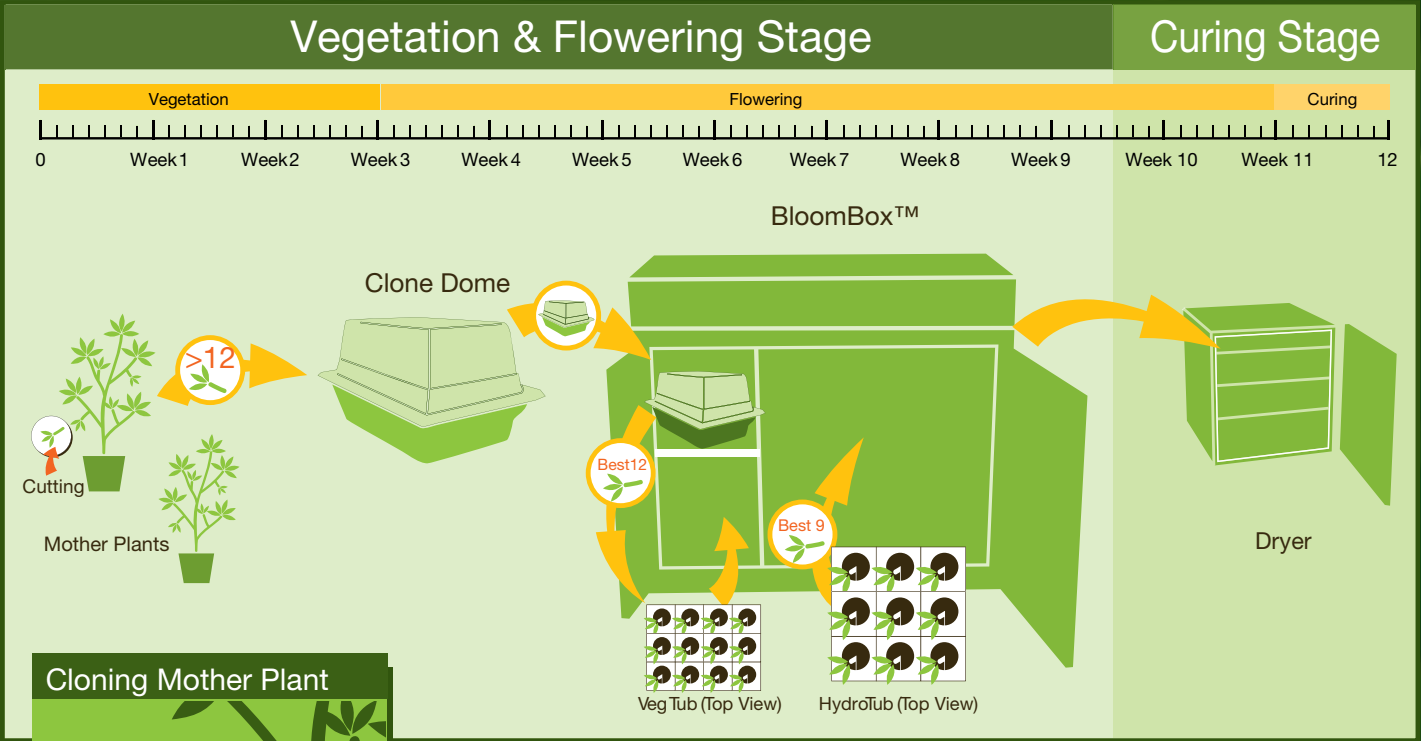

Our easy to use Dryer has over 7.5 square feet of curing space. The Dryer will help protect you from mold, offensive odors, and the mess normally associated with curing. This little wonder also speeds up drying time, allowing you to enjoy your product sooner.

Cloning Mother Plant

Cutting

1. Keep up to one mother plants in the left side of your BloomBox.
 2. Take at least 12 cuttings and place them in the clone dome.
 3. Place the clone dome on the removable shelf.
 4. When your cuttings have rooted (7-10 days) place them in the 12 pot vegetation tub.
 5. After another 7-10 days take your best 9 and move them into the flowering chamber for 7-8 weeks.
- Meanwhile: At week 5 of flowering, start a new batch of cuttings in the left side of your BloomBox. When your first batch is done you will have mature clones ready for round 2 of flowering, saving you 3 weeks per cycle!*
